Customer Feedback / Comments:

"I have used AloeElite too and it is incredible. At first, I was skeptical and just prayed I wasn't wasting my money, but I was willing to try anything. However, I would tell anyone interested in using it that you HAVE to use the Imodium at first. I didn't use it for the first month and I only felt a tiny bit better by the end of the bottle. I called them and they told me to use the Imodium and by the end of the second bottle, I felt so much better!" -- Actual Consumer Feedback from UlcerativeColitisForum[dot]com

"Well i said i would speak to you in a few weeks after I had commenced taking the Aloe Elite tablets, well I am hear to tell you that on the fifth day of taking these tablets I am feeling great. The stomach cramping has diminished, I am not passing blood, I still have slight diarrhea however I can control my trips to the toilet better." -- Actual Consumer Feedback from UlcerativeColitisForum[dot]com

"I also tried this product - it was magnificent. To me cheap = junk...It's not worth risking your health to save a few pennies. Looks like it works for nearly everyone"-- Actual Consumer Feedback from CureZone[dot]org
